SPACE II

Survey 2014

*Persons Serving Non-Custodial Sanctions
and Measures in 2014*

Key points of SPACE II 2014

- The participation rate in the 2014 SPACE II Survey was very satisfying: 45 out of the 52 probation services of the 47 Council of Europe Member States answered the questionnaire.
- About 87% of the probation services of the responding countries are placed under the authority of the national Ministry of Justice. This authority is shared with the Prison Administration in around 51% of these cases.
- During the year 2014, 1,373,912 persons entered into supervision by the probation services, and 1,134,567 left that supervision. This represents an average rate of 243.9 entries and 142.9 exits per 100,000 population. As a comparison, in 2013, there 254.6 entries per 100,000 inhabitants (-4.2% in 2014) and 182.2 exits per 100,000 inhabitants (-21.5% in 2014). Between 2010 and 2014, the entries into supervision per 100,000 population decreased by 2.6% and the exits decreased by 9.7%.
- On 31st December 2014, there were 1,212,479 persons under the supervision or care of the probation services of the responding countries. This represents an average of 184.7 per 100,000 inhabitants. As a comparison, on 31st December 2013, the average rate of persons under the supervision or care of the probation services was 209.1 per 100,000 inhabitants (-11.6% in 2014). Between 2010 and 2014, the decrease was -11.5%.
- Non-custodial sanctions and measures are seldom used as an alternative to pre-trial detention: Roughly, only 6.7% of the probation population corresponds to persons placed under supervision before trial.
- On average, on 31st December 2014, female probation clients represented 6.4% of the total probation population. The proportion of minors and foreigners was 1.7% and 2.8% respectively.
- On average, there are 6.6 probation staff members per 100,000 inhabitants, with great individual variation among the responding countries.
- On average, each probation staff member across Europe is in charge of 6.6 pre-sentence reports.
- In 23 countries, probation is used for all kind of criminal offences.
- The longer time serve in probation is, in average, 21.3 months for robberies.
- The time served in probation for violence against persons and sexual offences are 17.5 months and 20 months respectively.

COUNCIL OF EUROPE ANNUAL PENAL STATISTICS – SPACE II – PERSONS SERVING NON-CUSTODIAL SANCTIONS AND MEASURES IN 2014

by Marcelo F. AEBI and Julien CHOPIN¹

Introduction

The SPACE project

The SPACE II 2014 annual report is part of the SPACE project². This project produces an overview of the use of custodial and non-custodial sanctions and measures in the Member States of the Council of Europe under the form of two annual reports: *SPACE I* and *SPACE II*.

SPACE I, created in 1983, provides data on the populations held in custody in penal institutions across Europe³. The *SPACE I* report contains also information on the conditions of detention (e.g. capacity, expenses, staff) as well as on custodial movements (e.g. entries, releases, deaths, escapes). *SPACE II*, in 1992, collect information on persons serving non-custodial sanctions and measures. These sanctions and measures are frequently referred to as alternatives to imprisonment.

Data are collected by means of two questionnaires sent every year to the Penitentiary administrations and to the Probation authorities (or equivalent bodies of the Ministries of Justice). Data collection and validation, which involve a multilevel counterchecking of figures, are undertaken at the University of Lausanne. Both reports have the *common goal* of ensuring as much as possible the collection, analyses and interpretation of reliable data through a common methodology. In particular, the questionnaires used for the collection of the data are designed to allow the maximum comparability between Prison and Probation agencies, as well as among Member States of the Council of Europe (CoE). This implies that, in order to allow comparisons at the European level, States are asked to adapt their national categories to the categories proposed by SPACE. In addition, to improve the validity of comparisons, the questionnaire used for the survey includes questions on the particularities of the sanctions and measures used in each country and have enough room for comments.

Background and scope of the SPACE II survey

The 2014 version of SPACE II considers **persons serving non-custodial and semi-custodial sanctions and measures supervised by probation agencies** (or any other equivalent institution). These sanctions and measures are frequently referred to as *alternatives to imprisonment* and most of them are **community sanctions and measures (CMS)**.

According to the Council of Europe's Recommendation CM/Rec(2010)1, the concept of CSM refers to "sanctions and measures which maintain offenders in the community and involve some restrictions on their liberty through the imposition of conditions and/or obligations. The term designates any sanction imposed by a judicial or administrative authority, and any measure taken before or instead of a decision on a sanction, as well as ways of enforcing a sentence of imprisonment outside a prison establishment."

The persons who are under a sanction or measure alternative to imprisonment are generally under the supervision of the probation agencies of each country. By **probation agencies**, we mean any body designated by law to fulfil the tasks and responsibilities related to the implementation in the community of sanctions and measures defined by law. The work of probation agencies includes a range of activities and interventions, which involve supervision, guidance and assistance to the persons affected by such sanctions and measures. "Depending on the national system, the work of a probation agency may also include providing information and advice to judicial and other deciding authorities to help them reach informed and just decisions; providing guidance and support to offenders while in custody in order to prepare their release and resettlement; monitoring and assistance to persons subject to early release; restorative justice interventions; and offering assistance to victims of crime" (Recommendation CM/Rec(2010)1).

SPACE II is not designed to cover all the existing CSM. The sanctions and measures covered are basically those suggested by the Council of Europe through principle 15 of Recommendation Rec n° R (99)22 on prison overcrowding and prison population inflation. The Recommendation n° R (2000)22 enlarged the list of possible sanctions, and the Recommendation CM/Rec(2010)1 on the Council of Europe Probation Rules stated the principles that should guide the establishment and proper functioning of probation agencies.

The data gathered by the SPACE II survey includes the **stock (number of persons under the supervision or care of probation agencies on 31 December 2012)**, the **flow of entries (number of persons placed under the supervision or care of probation agencies during 2012)**, the **flow of exits (number of persons that have ceased to be under the supervision or care of probation agencies during 2012)**, **socio-demographic information** on these persons, and information on **the staff of probation agencies**. The report includes an annual rotating module, which, in 2014, relates to **victim-offender mediation**.

SPACE II **does not consider** the persons who **have finished to serve their sanction or measure** and that are **under the aftercare** of probation agencies according to Recommendation CM/Rec(2010)1.

In principle, SPACE II does not consider sanctions and measures imposed by the juvenile criminal law or applicable only to minors. However, some countries include minors in their figures (see Table 3.1).

The information included in this report was gathered through a questionnaire sent to all Member States of the Council of Europe. In that context, it must be pointed out that the questionnaire used since the 2010 SPACE II survey has been completely revised on the basis of the experience accumulated through the previous SPACE II surveys. The main revisions include the use of the **person** as the *counting unit* throughout the questionnaire, the inclusion of the **flow of exits** as a

new indicator, a clarification of the **status of probation agencies** inside the different criminal justice systems, the inclusion of the **reports** produced by probation agencies, as well as a new classification of the items included in the questionnaire. Comparability with previous SPACE II surveys is thus problematic, but the increase in the quantity and the quality of the answers received suggest that the new questionnaire produces better results, in terms of validity and reliability of the data, than the previous ones.

The goal of the survey is to gather and compare, in a reliable way, the information provided by Member States of the Council of Europe. In order to allow comparisons at the European level, States were asked to **adapt their national categories to the categories proposed by SPACE II**. Moreover, in order to improve the validity of such comparisons, the questionnaire used for the survey included questions on the particularities of the sanctions and measures used in each country and had enough room for comments.

This survey counted with the support of the European Organisation for Probation (CEP), which contacted all its Member States, encouraging them to answer the questionnaire.

Conventions used

***	The question is irrelevant. The item refers to a notion that does not exist in the respondent's criminal justice system.
0	The number is zero at the date of reference, but the item refers to a notion that exists in the respondent's criminal justice system.
...	No figures available, but the item refers to a notion that exists in the respondent's criminal justice system.
()	When the data are shown in brackets this means that they are not strictly comparable with the data requested by SPACE. For example, this may refer to items whose definition in a country is not the same as the one used in the SPACE questionnaire. The same is true when the total number of analysed figures is less or equal to 10 individuals.
[]	Figures between square brackets correspond to extreme values (outliers) and have not been included in the calculation of measures of central tendency.
---	When the questionnaire box is left blank or a symbol is used, whose meaning is not explicit (for example "/" or "-"), we used the symbol "- - -".

All the explanations and additional comments provided by the national correspondents are located in the notes to each Table.

Measures of central tendency

In Tables containing rates or percentages we have used the following measures to describe the distribution of the data:

- **MEAN:** THE ARITHMETIC MEAN IS THE OUTCOME OF DIVIDING THE SUM OF THE DATA SUPPLIED BY THE TOTAL NUMBER OF COUNTRIES. THE MEAN IS SENSITIVE TO EXTREME VALUES (VERY HIGH OR VERY LOW), THEREFORE, THE MEDIAN IS ALSO USED AS A MEASURE OF CENTRAL TENDENCY.
- **MEDIAN:** THE MEDIAN IS THE VALUE THAT DIVIDES THE DATA SUPPLIED BY THE COUNTRIES CONCERNED INTO TWO EQUAL GROUPS SO THAT 50% OF THE COUNTRIES ARE ABOVE THE MEDIAN AND 50% ARE BELOW IT. THE MEDIAN IS NOT INFLUENCED BY VERY HIGH OR VERY LOW VALUES.
- **MINIMUM:** THE LOWEST RECORDED VALUE IN THE GIVEN COLUMN OF THE TABLE.
- **MAXIMUM:** THE HIGHEST RECORDED VALUE IN THE GIVEN COLUMN OF THE TABLE.

FOR REASONS OF ACCURACY WE HAVE CALCULATED THE MEAN AND MEDIAN VALUES FROM THE ORIGINAL DATABASE, WHICH CONTAINS ALL THE DECIMALS NOT PRESENTED IN THE TABLES. READERS WHO REWORK THE CALCULATIONS FROM THE DATA IN THE TABLES - WHICH ONLY CONTAIN ONE OR TWO DECIMALS - WILL THEREFORE OBTAIN SLIGHTLY DIFFERENT RESULTS FROM OURS.

Demographic data

The rates presented in this report have been calculated using demographic data (total population of each European country on January 1st, 2014), taken from the *Eurostat Database* (“*Population on 1st January by age and gender*”⁴).

Exceptions: For some countries, the figures of the population are not available in the *Eurostat* datasets (i.e. for 2014 it was the case of Albania and Monaco). Moreover, some national correspondents provided information for different territorial divisions than the ones used in EUROSTAT demographic data. The territories concerned and the sources used for their demographic data are the following:

- **Andorra:** Demographic data are estimates. The estimates are done for 2014 on the basis of the natural changes of population and migration

Data Validation Procedure

According to the authors of the European Sourcebook of Crime and Criminal Justice Statistics (Strasbourg, Council of Europe, 1999), "validation is often the most important - and in many cases the most forgotten - stage of the data collection process". Therefore, we have introduced a validation procedure for the data received. Such procedure substantially increases the workload of all the individuals and countries involved in the elaboration of SPACE II. It also delays the publication of the data. However, we believe that the results obtained –in other words, the improvements to the quality of the data– justify its use.

As part of the validation procedure, we produced a preliminary version of SPACE II and a series of control Tables that revealed a number of inconsistencies in the data received from some countries. Those countries were contacted again by means of a telephone call or a personal letter –sent by e-mail or fax– setting out the specific problems encountered in their data. In some cases, it was imperative to translate some information in order to avoid mistakes. Most of the countries corrected their figures, sent new ones for certain parts of the questionnaire, or indicated the reasons for the divergences identified. Such divergences are mainly due to differences in the national prison statistics systems as well as in criminal justice systems across Europe and are explained in the notes to the relevant Tables.

Nevertheless, despite our efforts to identify errors and inconsistencies, some of them may still remain and others may have been introduced involuntarily during the data processing. Moreover, it has not always been possible to correct the inconsistencies discovered in a totally satisfactory way. In that context, any readers' comments, notes or criticisms are welcomed.

Response rate of the survey

Forty-five (45) countries and administrative entities answered the 2014 SPACE II questionnaire. In comparison, there were 25 for the 2007 edition, 34 for 2009, 43 for 2010, 44 for 2011 and 47 for 2013). It can be seen that there has been a constant increase (+88% from 2007 to 2014) in the number of answers received. Indeed, only 7 out of the 52 Member States and administrative entities of the Council of Europe **did not answer** the questionnaire, despite several reminders:

1. **Belgium**
2. **Bulgaria**
3. **Iceland**
4. **Lithuania**
5. **Poland**
6. **Russia**
7. **Ukraine**

The following countries answered the questionnaire mentioning that they have **no data available** for SPACE II 2014 report:

1. **BH: Republika Srpska:** There is currently no system of probation supervision and no probation agencies.
2. **BH (Bosnia and Herzegovina): State level:** There is currently no system of probation supervision and no probation agencies.
3. **BH: Federation of Bosnia and Herzegovina:** There is currently no system of probation supervision and no probation agencies.
4. **FYRO Macedonia:** For the specified period, no alternative measures were applied.
5. **Liechtenstein**

The constant increase in the number of respondents for the period 2007-2014 seems to reflect the fact that some probation agencies, still young at the time of the 2007 survey, are now willing to take part in this European comparative exercise.

Notes –Table A

Albania:

- General comment: The Albanian Probation Service is a central public organ, under the Ministry of Justice. The Probation Service consists of the General Directorate of Probation Service located in Tirana and local offices throughout the country. The General Directorate serves as the policy making, strategic and quality control over the probation work which executive staff from local offices performs. According to the Law on the Execution of Criminal Decisions, the Probation Service is the State body, which oversees the enforcement of alternative sentences, submits information and reports to the prosecutor or court according to this law. The Probation Service assists the enforcement of alternative sentences and supports the convict to overcome difficulties of social reintegration. Central State and local government units provide the Probation Service with the necessary assistance for the fulfilment of their legal obligations.

The General Directorate of the Probation Service is a mixture of management, support and executive staff. It implements national policies and strategies, organizes local offices to provide services, ensures quality control over the service provided and supports the infrastructure and logistics necessary for the service provided at a local level. The General Directorate of the Probation Service also includes the Electronic Monitoring Unit, which gives it an executive nature.

The values underlying the activity of the Probation Service are, respect for human dignity, the concept of individual opportunities for change and growth, as well as being fair and impartial.

The primary mission is to protect the community and prevent re-offending. Our approach is that such protection and security would be possible by counseling and assisting offenders during reintegration and successful rehabilitation in the community by implementing established methods and instruments in overcoming the difficulties for social reintegration and bringing positive changes in their lives.

The purpose of the Probation Service in Albania is that of supervision and support of :
Implementation of alternatives to imprisonment in order to protect the public interest,
Prevention of criminal conduct,

Assisting offenders to fulfill obligations and reaching compliance with judge orders,
Co-operation and presentation of information and reports before the prosecution and the court,

To fulfill these goals, the Probation Service, where this is necessary, cooperates with state institutions, central or local and with the local community, as well as with other institutions and nonprofit organizations for the best implementation of alternatives to imprisonment.

The Probation Service cooperates closely with other institutions of the criminal justice system such as courts, prosecutors, state police, the General Directorate of Prisons, during various stages of the process an offender goes through.

The essence of the role of the probation service as an added value to the criminal justice system is that of providing assessment, prevention and remedial, aimed at reducing criminal activity and raising security for people living in these communities.

Andorra:

- H: "Other" are:
Social services of the Government of Andorra.
Treatment against addiction Unit (alcoholism, narcotic substances, etc.).

Austria:

- General comment: the Austrian Probation Service "Verein Neustart" is an association, which is subsidized (around 90 percent) by the Federal Ministry of Justice.

Azerbaijan:

- General comment: Probation Services do not exist in Azerbaijan. The Ministry of Justice is responsible for the execution and supervision of non-custodial sanctions (community sanctions and measures (CMS), as well as for exercising control over conditionally released persons).

BiH: Republika Srpska:

- General comment: In Bosnia and Hercegovina, and the Republic of Srpska, since there is currently no sistem of probation supervision or probation agencies were established.

Cyprus:

- General comment: The Prison Administration is under the authority of the Ministry of Justice. The Police (Ministry of Justice) and the Social Welfare Services (of the Ministry of Interior) are not considered probation agencies. However, these two official bodies employ probation officers who handle probation cases (among other responsibilities that they have).

Czech Republic:

- General comment: Probation and Mediation Service of Czech republic (PMS) is an organizational unit of the Czech Republic. Supervision of the activities is carried out by the Ministry of Justice.

Georgia:

- H: The National Agency for the Execution of Non-custodial Sentences and the Probation Agency are under the jurisdiction of the Ministry of Corrections and Legal Assistance of Georgia.

Hungary:

- General comment: Local probation services operate within government offices in the counties. Government offices are under the authority of Prime Minister's Office. At the same time professional operation of local probation services belongs to Ministry of Justice. In August 2014 some traditional tasks of Probation Service was delegated to the Prison Service: parole with probation, advisory reports with respect to conditional release and after-care, some types of social inquiry reports related to imprisonment. Penitentiary probation officers fulfil these tasks. Office of Justice fulfils professional tasks in relation with probation work and it is part of the Probation Service. The Office of Justice is under the authority of Ministry of Justice.

Latvia:

- General comment: Latvian law on State Probation Service (SPS) defines the SPS as "a State administrative institution under the supervision of the Ministry of Justice".

Malta:

- General comment: The Directorate of Probation and Parole (DPP) was set up on 1 January 2012. In 2011 the objectives of the Probation Services were revised in preparation for the implementation of the new functions. On an administrative level, the Probation Services were to be separate and distinct from the Correctional Services. On a legislative level, the department was to assume the responsibilities of the Parole and Victim Support functions in addition to the Probation services. As from 1 September 2011, Probation Officers started using the established risk assessment and risk management tools to all new post-sentencing cases. This also led to ongoing collaborations with the Institute of Criminology within the University of Malta, which is the main provider of training to probation officers. In-service training is also provided by the Probation Services in collaboration with various organizations, including the Institute of Criminology. The Department also works in close cooperation with local and foreign stakeholders, such as the Police, Criminal Court and Correctional Services. Senior officials also participate in workshops, seminars and conferences held locally or abroad on issues relating to criminal justice, in particular Restorative Justice issues.
- Categories of documents held by the Department of Probation and Parole:
 - Register of offenders as referred to by the Court.
 - Case Files on all offenders referred to the Department by the Court.
 - Case statistics.
 - General Correspondence.
 - Personal files of staff.
 - Human Resources Documents.
 - Accounts Documents.
 - Internal Administration Documents.
 - Standard forms determining information at the pre and post sentencing stage.
 - Community Service Order Guidelines.

Netherlands:

- General comment: In the Netherlands, there are three probation agencies, which are independent private bodies. These agencies are almost fully financed by the Ministry of Justice.

Norway:

- General comment: The Ministry of Justice and National Security is responsible for the Directorate of Corrections. The Directorate of Corrections administers 5 regional units which, in turn, administer prisons and probation offices. I.e. prisons and probation are one and the same service.

San Marino:

- General comment: General comment: The probation services in the Republic of San Marino are a public organism depending on the Ministry of Justice.

Serbia:

- General comment: Probation services do not exist in Serbia. Alternative sanctions are enforced by the Department for treatment and alternative sanctions, within the Administration for the Enforcement of Criminal Sanctions (prison administration).

Slovak Republic:

- General offence: In Slovak Republic, probation services are under the authority of the district courts

Slovenia:

- General comment: In Slovenia, a part of the tasks of the probation services are carried out by the Prison Administration of the Republic of Slovenia as a body of the Ministry of Justice (e.g. weekend prison) and by centers for social work in case of conditional sentence under protective supervision or in case of conditional release under protective supervision, or community service.

Spain (State Administration):

- General comment: Under the frame of this general secretariat there are two general deputy directorships directly related with this figure: the general deputy directorship of penitentiary treatment and management is in charge of managing prison sentences in the different modalities of semi-freedom, and the general deputy directorship of alternative penalties and measures is in charge of managing conditional release and the execution of penalties and measures alternatives to imprisonment.

UK: Northern Ireland:

- General comment: The Northern Ireland Assembly is the devolved legislature for Northern Ireland. It is responsible for making laws on transferred matters in Northern Ireland and for scrutinising the work of Ministers and Government Departments. The Probation Board for Northern Ireland is a Non Departmental Public Body, its sponsoring department is the Department of Justice.

UK: Scotland:

- H: Probation services in Scotland are funded through the Scottish Government equivalent of the Ministry of Justice (Directorate General of Learning and Justice). The funding is then distributed by geographically-based Community Justice Authorities to local government bodies (local authorities) who manage the operation of criminal justice social work through their social work departments. Some services are also provided by the voluntary sector.

Section A: Persons under the supervision or care of probation agencies in 2014

COUNTING UNIT: THE PERSON

The counting unit in Section A is **the person**, and not the number of cases or records. The goal is to know the number of persons that on 31st December 2014 (stock), respectively during the year 2014 (flow), were under the supervision or care of probation agencies.

Items 1 and 2 (in Tables 1.1 to 2.3): Forms of probation/supervision

Definitions and explanations

1.1, 2.1 Forms of probation/supervision before the sentence

1.1.1, 2.1.1 ALTERNATIVES TO PRE-TRIAL DETENTION WITH SUPERVISION BY PROBATION AGENCIES (TOTAL)

Pre-trial detention is used in this questionnaire as a synonym of remand in custody. Remand in custody is any period of detention of a suspected offender ordered by a judicial authority and prior to conviction; it also includes any period of detention after conviction whenever persons awaiting either sentence or the confirmation of conviction or sentence continue to be treated as unconvicted persons (Rec (2006) 13, ch.1).

1.1.1.1, 2.1.1.1 ELECTRONIC MONITORING

Electronic Monitoring allows the localization of the person using different techniques. Electronic monitoring can be pronounced as a sanction in its own right, as a condition attached to a suspended or conditional sentence, or as a condition attached to a conditional release.

1.1.1.2, 2.1.1.2 HOME ARREST

The person is required to remain in a permanent way at his/her residence. If, in your country, home arrest is used exclusively with Electronic Monitoring, please indicate it under the heading "Comments".

1.1.2, 2.1.2 CONDITIONAL SUSPENSION OF THE CRIMINAL PROCEEDINGS

This item refers to cases where the whole procedure is postponed before the person is found guilty. Indeed, it covers cases where, before any finding of guilt, an authority of the criminal justice system (examining magistrate, court, prosecutor or other) orders the suspension of the procedure for a given time in order to assess the behaviour of the accused person during that period or to allow mediation or conciliation procedure.

1.1.3, 2.1.3 DEFERRAL (POSTPONEMENT OF THE PRONOUNCEMENT OF A SENTENCE)

Cases where the person is found guilty, but the decision on the sentence to be imposed is postponed during a certain period of time in order to appreciate the evolution of the behaviour of the person during that time. At the end of it, and according to the evolution of his/her behaviour, the person can be sentenced or the proceedings can be filed. Cases in which the deferral is pronounced without probation are not included.

1.1.4, 2.1.4 VICTIM-OFFENDER MEDIATION

Mediation is a way of resolving conflicts or differences of interests between the offender and the victim. It is not a CSM but it is sometimes handled by probation agencies.

1.2, 2.2 Forms of probation/supervision after the sentence**1.2.1, 2.2.1 FULLY SUSPENDED CUSTODIAL SENTENCE WITH PROBATION**

The judge can attach conditions to the suspension of a sentence during a given period. The person has been sentenced to imprisonment, but the enforcement of the sanction is suspended and the person remains under the obligation to conform to the conditions imposed.

1.2.2, 2.2.2 PARTIALLY SUSPENDED CUSTODIAL SENTENCE WITH PROBATION

The partial suspension allows the judge to pronounce a sentence of imprisonment of which a part is served under custody and the other is suspended. In this category are also counted periodical prison stays (e.g. semi-custodial sanctions) accompanied by probation supervision during the rest of the time.

1.2.3, 2.2.3 CONDITIONAL PARDON OR CONDITIONAL DISCHARGE (WITH PROBATION)

The pardon or the discharge are granted if the attached requirements (e.g. payment of the damages to the victim, detoxification therapy, etc.) have been fulfilled during a given period of time. The conditional pardon can be pronounced after a sentence has been imposed. The discharge can be pronounced when the person is found guilty (i.e. before the sentence is imposed).

1.2.4, 2.2.4 COMMUNITY SERVICE

Community service consists in unpaid work for the benefit of society. Community service can be pronounced as a sanction on its own right, as a condition attached to a suspended or conditional sentence or a conditional release, as well as a supplementary sanction. **If community service is combined with another CSM, the number is included under item 1.2.10, respectively 2.2.10.**

1.2.5, 2.2.5 ELECTRONIC MONITORING

Please refer to the definition provided for item 1.1.1.1

1.2.6, 2.2.6 HOME ARREST

Please refer to the definition provided for item 1.1.1.2

1.2.7, 2.2.7 SEMI-LIBERTY (INCLUDING WEEKEND IMPRISONMENT AND IMPRISONMENT ON SEPARATE DAYS)

Under this regime, the offender must spend a certain amount of time in the community and a certain amount of time in prison. The time spent in prison can be placed at different times. For example, the person may be obliged to spend the nights, the weekends or certain days in prison.

1.2.8, 2.2.8 TREATMENT

Treatment requirements can be pronounced at different stages of criminal proceedings. These may concern treatment provided for drug-dependent, alcohol-addicted offenders, as well as offenders with mental disorders and persons convicted for sexual offence.

1.2.9, 2.2.9 CONDITIONAL RELEASE / PAROLE WITH PROBATION

Conditional release of a prisoner before the end of his/her sentence (also known as parole) under individual/specific conditions.

1.2.10, 2.2.10 MIXED ORDERS

Two or several types of CSM ordered at the same time or that supplement each other during the execution of the sentence. The applied combinations are presented in the subcategories of item 1.2.10, respectively 2.2.10.

- General comment: Data for the territory of Germany (except for items 1.0 and 1.2.5), are taken from statistics published by the Federal Statistical Office in Wiesbaden
- 1.0: This number covers data for December 31st 2011 (more recent data is not yet available) and for the former territory of the Federal Republic of Germany including Berlin (data for December 31st 2007), Brandenburg (data for December 31st 2009) and Mecklenburg-Vorpommern but without Hamburg. Electronic monitoring is not exclusively used with home arrest. It can be free from restrictions of the monitored person's whereabouts or there can either be inclusion zones that must not be left or exclusion zones that must not be entered.

Hungary:

- General comment : The Hungarian Probation Service deals both with adult and juvenile offenders. Numbers referring to juvenile offenders are not included in the given numbers. Probation supervision is a measure in the Hungarian law that in the

case of adult offenders can be ordered with conditional suspension of the criminal proceeding, with conditional discharge, with suspended custodial sentence, with restitution work and with conditional release/parole. Since August 2014 tasks related to parole with probation belong to the Prison Service and are fulfilled by penitentiary probation officers. Treatment refers to persons under drug diversion. In the case of drug diversion the criminal proceeding is suspended before the accusation and the accused person is put under probation supervision. The number of persons under drug diversion is included in the number 1.1.2.: conditional suspension of criminal proceeding. We can't provide stock number of probation with restitution work.

Ireland:

- 1.1.1.3: "Other" are:
Judicial control (*Contrôles judiciaires*): 16.
- 1.2.5, 1.2.6: Home arrests are exclusively applied with electronic monitoring.

Moldova:

- General comment: The sum of the subcategories is not equal to the total provided in 1.0 because they are related to a number of measures, not to a number of persons (1 person => n measures).
- 1.2.11: "Other" are:

Deprivation of the right to hold certain functions or to perform certain activities: 4384.
Postponement of the enforcement of punishment for pregnant women or women who have children of up to 8 years of age: 80.
Application of educational measures: 10.

Netherlands:

- 1.1.1.1 Electronic monitoring in the Netherlands is not a sanction in its own right, but as a condition attached to:
 - pre-trial supervision by probation agencies (1.1.1.1, without electronic monitoring is 1.1.1.3)
 - fully or partially suspended custodial sentence with probation (1.2.5, without electronic monitoring are 1.2.1 and 1.2.2 (these can not be separated in the statistics));
 - conditional release with probation (1.2.9, total of 1.578 is 854 with electronic monitoring and 724 without electronic monitoring).
- 1.1.1.3: others are Pre-trial supervision by probation agencies without electronic monitoring (3103)
- 1.2.5 is fully or partially suspended custodial sentence with probation with the attached condition 'electronic monitoring'. It's not the number of persons who experienced electronic monitoring after the sentence. The total number of persons with fully or partially suspended custodial sentence with probation = 1/2.2.1 + 1/2.2.2 + 1/2.2.5.
- 1.2.10 Mixed orders are Fully or partially suspended custodial sentence with probation (1/2.2.1/2 and with electronic monitoring 1/2.1.1.1) and community service (1/2.2.4). In our data is not certain if they are ordered at the same time or that supplement each other during the execution of the sentence. Persons with mixed orders are therefore counted double (Fully or partially suspended custodial sentence with probation and community service).
- Home arrest (1.1.1.2 and 1.2.6) is also called Electronic Detention (frontdoor EM). Home arrest in the Netherlands was only used after the sentence. In 2003 a pilot project started introducing Electronic Detention (ED) as an alternative for prison sentences of less than 91 days. The main reason for starting the experiment was the fact that during those days the Netherlands suffered a huge shortage of capacity. The measure was refined in March 2005 and March 2010, describing more extensively the rules and regulations around ED, defining target groups more strictly, accentuating and extending reasons for exclusion, etc. There was no legal foundation (ED was not laid down as a law) and the legal foundation was never established. The regulations were withdrawn on the 1st of July of 2010. So to date, ED is no longer an alternative for short prison sentences (NAP for 2011, 2012, 2013 and 2014). The Netherlands at this time doesn't have a shortage of capacity.
- 1.2.7 Stock is measured at 31-12-2014. Other Stock is measured at 01-01-2015.
- Training order was a sanction in its own right. It's been gradually replaced by probation with training order as attached condition. Since 2013 training order is no longer applicable

Norway:

- 1.2.1: The "fully suspended custodial sanction with probation" consists of a conditional sentence where the offender has to participate in a program for intoxicated drivers (446) or a sentence where the offender must participate in a drug court-like program (41).
- 1.2.4: The community sentence in Norway is more than Community service. It may consist of unpaid work, but also various crime-preventing measures. Usually around 60-65 % of the hours are spent on unpaid work.
- 1.2.11: This category "Other" is unspecified.

Portugal:

- General comment: The sum of distinct persons under supervision, in 31st Dec, of a particular measure is different from the total of distinct persons under supervision of all measures due to the fact that some persons can have more than one measure simultaneously.
- 1.1.1.1: Before the sentence, Electronic Monitoring is used: 1) As a way of executing home arrest as alternative to pre-trial detention 2) As a way of monitoring the court restrain orders in cases of domestic violence (167).
- 1.1.1.2: Home arrest is used exclusively with Electronic Monitoring (369)
- 1.1.1.3: "Other" are:
Supervision of imposition of conditions: 114.
Supervision of treatment: drug dependents: 62.
- 1.2.5, 1.2.6: After the sentence, Electronic Monitoring is used: 1) As a way of executing home arrest as alternative for prison (67); 2) As a condition release adaptation period (20); 3) As a way of monitoring the court restrain orders in cases of domestic violence (122); 4) As modification of imprisonment, especially aimed at disease cases (4).

Romania:

- 1.2.1: The figure only reflects the number of adults.
- 1.2.4: According to the legislation in force, in the criminal field, the community service can be imposed to an adult as an obligation in case of the suspension of the enforcement of the sentence under supervision.
- 1.2.3, 1.2.9: The conditional suspension of the enforcement of the sentence, the conditional pardon or conditional discharge and conditional release without probation also exists in the romanian legislation, but the probation system does not have any competence in this respect.

San Marino:

- 1.2.1, 1.2.4: These numbers represent the same persons. Every fully suspended custodial sentence is combined with community service.

Serbia :

- 1.2.5: These figures pertain to home arrest/detention with electronic monitoring, because in the Serbian jurisdiction, an electronic monitoring measure is used only as an option to home arrest/detention (two options: home arrest/detention with or without electronic monitoring).
- 1.1.1.2, 1.2.6: This item refers to persons submitted to home arrest without electronic monitoring.

Slovak Republic:

- General comment: There is no statistical data for 2014.

Slovenia:

- General comment: Data contain uniquely information about number of cases.

Spain:

- General comment: The sum of the subcategories is not equal to the total provided in 1.0 because they are related to a number of measures, not to a number of persons (1 person => n measures).
- 1.1.4: Applies only for the autonomous community administration, not for General State Administration.
- 1.2.5: Electronic monitoring is a modality of execution of prison sentence in semi-freedom regimen, as an alternative to conventional imprisonment (art86.4 penitentiary rule).

- 1.2.10: Applies only for the autonomous community administration, not for General State Administration.

UK: England and Wales

- General comment: Figures given in sub-categories 1.2.4, 1.2.5, 1.2.8, 1.2.10 and 1.2.11 are breakdowns of total Community Orders.
- 1.0: The total number of persons in 1.0 is lower than the sum of the component parts because it counts persons only once, and they may appear in more than one sub-category (ie 1.2.1 and 1.2.4). Persons are however only counted once in sub-category 1.2.1, 1.2.9 and once only in all other sub-categories combined.
- 1.2.4: Community Orders with standalone unpaid work only.
- 1.2.5: Community Orders with standalone curfews only. Most standalone curfews are not supervised by the probation service.
- 1.2.6: Home arrest is used exclusively with electronic monitoring.
- 1.2.8: Includes orders containing drug, alcohol, mental health treatments, accredited programs and supervision.

Standalone supervision: 7480.
Standalone specified activities: 740
Other standalone requirements: 598.

UK : Northern Ireland

- 1.0: The sum of the items is slightly higher than the overall total because some people are subject to more than one order. 1.0 is the total number of people under supervision by PBNI at 31 December 2014. This figure includes people who commence their sentence in custody. This figure excludes people that PBNI supervise serving a Juvenile Justice Centre Order.

UK : Scotland

- General comment: figures are as at 31 March 2014. They cover only community payback orders and drug treatment orders as well as an estimate for restriction of liberty orders at 1.2.5. They do not include the legacy orders which are being

replaced over time by community payback orders and therefore the total is an undercount by approximately 3,000. Some figures are estimated as full data on stock was only available for 29 of the 32 local authority areas in Scotland. All estimated figures are rounded to the nearest 100.

- 1.2.5 includes restriction of liberty orders and a small number of community payback orders with a restricted movement requirement (ankle tag). Figures do not include prisoners released on home detention curfew.

Hungary:

- The Hungarian Probation Service deals both with adult and juvenile offenders. Numbers referring to juvenile offenders are not included in the given numbers. Probation supervision is a measure in the Hungarian law that in the case of adult offenders can be ordered with conditional suspension of the criminal proceeding, with conditional discharge, with suspended custodial sentence, with restitution work and with conditional release/parole. Since August 2014 tasks related to parole with probation belong to the Prison Service and are fulfilled by penitentiary probation officers. Treatment refers to persons under drug diversion. In the case of drug diversion the criminal proceeding is suspended before the accusation and the accused person is put under probation supervision. The number of persons under drug diversion is included in the number 2.1.2. conditional suspension of criminal proceeding.
- 2.2.11: "Other" are:
Restitution work : 67.

Ireland:

- General comment : The total of all people on different orders is 7,096. However some offenders can be subject to more than one order at any given time. The number

given in section 1.0 (6,241) includes some offenders counted more than once in section 1.2. These offenders are just counted once in section 1.0.

- 2.2.10: "Mixed orders" are :
Probation Supervision with community service : 6.

Italy:

- 2.2.1: Persons assigned to the probation service directly from liberty, excluding the drug addicted offenders, who come under point 2.2.8.
- 2.2.8: Drug addicted offenders assigned to the probation service both from detention and from liberty.
- 2.2.9: Persons assigned to the probation service from the state of detention.
- 2.2.10: "Mixed orders" are:
Supervised liberty: 1800.
Substitutive sanctions: 267.
- 2.2.11: "Other" are:
Activity of observation of offenders at liberty: 12641.
Inquiries for security measures: 1540.

Latvia:

- General comment: The information is provided for the number of cases because the State Probation Service doesn't have statistics about the number of persons. However, the number of persons must be slightly less than the number of cases (approximately 5 percent less).
- 2.2.10: "Mixed orders" are:
Community service and fully suspended sentence with probation: 112.
Community service and imprisonment : 111.
Community service and probation supervision : 3

Luxembourg:

- 2.1.1.3: "Other" are:
Judicial control (*Contrôles judiciaires*): 8.
- 2.2.5, 2.2.6: Home arrests are exclusively applied with electronic monitoring.
- 2.2.11: "Other" are:
Suspension of the punishment (*Suspensions de peine*): 29.

Moldova:

- 2.0: The sum of the subcategories is not equal to the total provided in 2.0 because they are related to a number of measures, not to a number of persons (1 person => n measures).
- 2.2.11: "Other" are:
Deprivation of the right to hold certain functions or to perform certain activities: 2746.
Postponement of the enforcement of punishment for pregnant women or women who have children of up to 8 years of age: 37.
Application of educational measures : 15.

Netherlands:

- 2.1.1.1 Electronic monitoring in the Netherlands is not a sanction in its own right, but as a condition attached to:
- 2.1.1.3: others are Pre-trial supervision by probation agencies without electronic monitoring (3635)

- 2.2.5 is fully or partially suspended custodial sentence with probation with the attached condition 'electronic monitoring'. It's not the number of persons who experienced electronic monitoring after the sentence. The total number of persons with fully or partially suspended custodial sentence with probation = 2.2.1 + 2.2.2 + 2.2.5.
- 2.2.7 Stock is measured at 31-12-2014. Other Stock is measured at 01-01-2015.
- 2.2.10 Mixed orders are Fully or partially suspended custodial sentence with probation (1/2.2.1/2 and with electronic monitoring 1/2.1.1.1) and community service (1/2.2.4). In our data is not certain if they are ordered at the same time or that supplement each other during the execution of the sentence. Persons with mixed orders are therefore counted double (Fully or partially suspended custodial sentence with probation and community service).

Norway:

- 2.2.1: The "fully suspended custodial sanction with probation" consists of a conditional sentence where the offender has to participate in a program for intoxicated drivers (497) or a sentence where the offender must participate in a drug court-like program (13).
- 2.2.4: The community sentence in Norway is more than Community service. It may consist of unpaid work, but also various crime-preventing measures. Usually around 60-65 % of the hours are spent on unpaid work.

Portugal:

- General comment: The sum of distinct persons under supervision, during year 2013, of a particular measure is different from the total of distinct persons under supervision of all measures due to the fact that some persons can have more than one measure simultaneously.
- 2.1.1.2: Home arrest is used exclusively with Electronic Monitoring
- 2.1.1.3: "Other" are not specified: 179.
- 2.1.1.1 - Before the sentence, Electronic Monitoring is used: 1) As a way of executing home arrest as alternative to pre-trial detention; 2) As a way of monitoring the court restrain orders in cases of domestic violence (262).
1.1.1.2 - In Portugal, home arrest is used exclusively with Electronic Monitoring (458).
1.1.1.3 - "Other" are: Supervision of imposition of conditions (129) and Supervision of treatment, drug dependents (50). After the sentence, Electronic Monitoring is used: 1) As a way of executing home arrest as alternative for prison (114); 2) As a condition release adaptation period (42); 3) As a way of monitoring the court restrain orders in cases of domestic violence (83); 4) As modification of imprisonment, especially aimed at disease cases (2).

Romania:

- 2.2.1: The figure only reflects the number of adults.
- 2.2.4: According to the legislation in force, in the criminal field, the community service can be imposed to an adult as an obligation in case of the suspension of the enforcement of the sentence under supervision.
- 2.2.3, 2.2.9: The conditional suspension of the enforcement of the sentence, the conditional pardon or conditional discharge and conditional release without probation also exists in the romanian legislation, but the probation system does not have any competence in this respect.
- 2.2.10 Mixed orders are: Postponement of penalty enforcement and treatment: 265.

Postponement of penalty enforcement and community service: 8.

Conditional release with probation and treatment: 1.

- 2.2.11 Other are: Postponement of penalty enforcement: 1844.

Serving the penalty by fine by performing community service: 14.

San Marino:

- 2.2.1, 2.2.4: These numbers represent the same persons. Every fully suspended custodial sentence is combined with community service.

Slovak Republic:

- General comment: There is no statistical yearbook for 2014.

Slovenia:

- 2.1.1.2. Home arrest before the sentence: In 2014 home arrest was ordered in 72 cases (68 in district courts (of this 6 against minors) and 4 in local court).
- 2.1.4. Victim-offender mediation: The information has been drawn from the Joint report on the work of Public prosecutors, although normally this information would be drawn from the Statistical report on criminality. However, at the time of the filing of this questionnaire, the Criminality annual report for 2014 has not yet been released. For the same reason we cannot provide statistical data for point 2.2.8. (treatment).
- 2.2.6. Home arrest after the sentence: in 2014, prison sentence was replaced by home arrest in 13 cases (4 in district and 9 in local courts), out of 62 petitions (28 in district and 34 in local courts).
- 2.2.11: "Other" are not specified.

Spain (State Admin.) :

- General comment: In this item, Spain only includes data related to penalties and measures imposed in a sentence as alternatives to imprisonment, as well as conditional release. Data related with the execution of the prison sentence in the different modalities of semi-freedom are not included.

The sum of the subcategories is not equal to the total provided in 1.0 because they are related to a number of measures, not to a number of persons (1 person => n measures).

- General comment: Figures given in sub-categories 2.2.4, 2.2.5, 2.2.8, 2.2.10 and 2.2.11 are breakdowns of total Community Orders.
- 2.0: The total number of persons in 2.0 is lower than the sum of the component parts because it counts persons only once, and they may appear in more than one sub-category (ie 2.2.1 and 2.2.4). Persons are however only counted once in sub-category 2.2.1, 2.2.9 and once only in all other sub-categories combined.
- 2.2.4: Community Orders with standalone unpaid work only.
- 2.2.5: Community Orders with standalone curfews only. Most standalone curfews are not supervised by the probation service.
- 2.2.8: Includes orders containing drug, alcohol, mental health treatments, accredited programs and supervision.
- 2.2.10: "Mixed orders" are any combination of 12 possible requirements: unpaid work, supervision, accredited programs, drug treatment, alcohol treatment, mental health treatment, specified activities, prohibited activities, curfew, exclusion, attendance centre, residential.
- 2.2.11: "Other" are:
Standalone supervision: 9496.
Standalone specified activities: 1397.
Other standalone requirements: 1626.

UK : Northern Ireland

- 2.0: The sum of the items is slightly higher than the overall total because some people are subject to more than one order. 2.0 is the total number of people under supervision by PBNI at 31 December 2014. This figure includes people who commence their sentence in custody. This figure excludes people that PBNI supervise serving a Juvenile Justice Centre Order.

- General comment: Figures are for financial year 2013-14.
- 2.1.1.3: "Other" are:
Supervised bail: 417.
The figures in 2.2.4, 2.2.5, 2.2.10 and 2.2.11 contain estimated breakdowns for

community payback orders as full data was only available for this data for 29 of the 32 local authority areas in Scotland. The figures also do not include legacy probation orders with specific requirements which are being phased out by the community payback order. All estimated figures have been rounded to the nearest 100.

- 2.2.5 : this figure include restriction of liberty orders and a small number of community payback orders with a restricted movement requirement (ankle tag). Figures do not include prisoners released on home detention curfew.
 - 2.2.8 : This figure include drug treatment and testing orders and the number of drug treatment, alcohol treatment and mental health treatment requirements issued as part of community payback orders.
 - 2.2.10: "Mixed orders" are:
 - Probation order with requirement for unpaid work: 71.
 - Community payback orders with unpaid work and supervision: 6629.
 - 2.2.11: "Other" are:
 - Probation orders with standard conditions: 67.
 - Supervised attendance orders (for fine default): 779.
- Community payback orders with with supervision only: 2159 (estimate).

Item 3 (in Tables 3.1 and 3.2): Socio-demographic characteristics of the population under the supervision or care of probation agencies

Table 3.1 indicates whether minors, females and foreigners are included in the total number of persons serving CSM of being under probation. Whenever these categories are included, and the relevant information is available, the Table also provides their number on the stock and the flow. Table 3.2 is a breakdown of these numbers relatively to items 1 and 2. Only countries that provided data are included in these two tables.

Notes – Tables 3.1 and 3.2

Cyprus:

- 3.1.1: For the Police, the maximum age is 18 and for the SWS it is 20.
- 3.1: 379 cases of stock refer to the Social Welfare Services and 11 cases of flow refer to the Social Welfare Services.
- 3.2, 3.3: Figures are provided by the police

Czech Republic:

- 3.1.1: Czech Republic distinguishes between "minors" (aged 0 to 14), who are not liable under criminal law, and "youth" (aged 15 to 17), who are partially liable under the said law.
- 3.3: PMS also works with foreigners, but our registration system does not allow to distinguish these characteristics.

Germany:

- 3.1.1: German criminal law differentiates between "Youth" and "Young Adults":
"Youth" means 14-17 (at the time of the act);
"Young adult" means 18-20 (at the time of the act). "Young Adults" can be sentenced on the basis of Youth Court Law as well as on the basis of general law (German Criminal Code).

Hungary:

- General comment: Probation Service deals both with juvenile and adult cases.
- 3.3: Data system doesn't include the number of foreigners.

Ireland:

- 3.1: Age in Stock is calculated as age at end of year. Age flow is calculated as age at time order is made.

Italy:

- General comment: Minors are not under the responsibility of the Department of Penitentiary Administration.

Latvia:

- General comment: Data are not available.

Moldova:

- General comment: The probation services do not keep statistics regarding the number of females and foreigners. The division is only made between adults and juveniles.

Norway:

- General comment: data for stock are not available.

Romania:

- 3.2, 3.3: There are no available separate data regarding the women and the foreigners.

Spain (State Administration):

- 3.1: Probation services are not in charge of people under 18. Minors are managed by non penitentiary autonomous communities services.
- 3.1.1: The minimum criminal age in Spain is 18. Underaged offenders are competence of the Autonomous Communities through non-penitentiary community services.

UK: Scotland:

- General comment: Figures include exact numbers for community payback orders and drug treatment and testing orders but are estimated for all others. Estimated figures have been rounded to the nearest. Stock figures given are as at 31 March 2013 and flow figures are for the financial year 2013-14.

Item 4 (in Tables 4.1 to 4.3): Number of persons that ceased to be under the supervision or care of probation agencies during the year 2014 (FLOW OF EXITS)

This item focuses on the number of persons leaving the supervision or care of probation agencies throughout the year and on the different reasons of these exits.

Table 4.3 shows the estimated turnover ratio (per 100 probation clients likely to « exit » probation) for each country. This ratio corresponds to the estimated exit rate per 100 potential exits. The calculations are based on raw data: the probation populations on 31st December 2012 (stock) were retrieved from the previous report (SPACE II 2012) and the numbers of entries (flow of entries) and releases (flow of releases) in 2014 were taken from Tables 2.1 and 4.1 of the present report. The sum of stock and flow of entries provides an estimation of the total number of probation clients likely to be released during the year (i.e. potential exits). This number is then put in relation with the effective number of releases during 2014. The countries for which one (or more) of these three indicators (stock 2012, flow 2014 and exits 2014) was not available do not appear in the table because their turnover ratio could not be calculated.

Definitions and Explanations

4.1 Completion

The probation has been completed and is considered as duly accomplished. As a consequence, the person is no longer under the supervision or care of probation agencies.

4.2 Revocation

The sanction or measure is revoked because of a violation of the conditions imposed. Usually the person is discharged to custody, even if the probation agencies cannot always verify that the person has actually been incarcerated.

4.3 Imprisonment

The person supervised is incarcerated following the commission of a new offence. If the incarceration is the consequence of the revocation of the sanction or measure for which the person is under probation, it should be counted under heading 4.2 (revocation).

4.4 Absconder

The person supervised has escaped and is no longer under the supervision of probation agencies.

On that date, both the national probation service (nps) and the community rehabilitation companies (crcs) were formed.

2. The figures provided are therefore a snap shot of staff in post (fte) employed by both the nps and crcs (irrespective of funding status) as at 31st December 2014, and are subject to the expected level of inaccuracy inherent in any large-scale administrative system.

3. Please note, due to the change in structure of probation on 1st June 2014 figures provided are not directly comparable to those provided in previous space ii questionnaires

4. Staffing data for nps/crcs were not collected by grade but by pay band. The general descriptions for each of the pay bands are as follows: chief executive officer band; pay bands a - d (assistant chief executive & equivalents); pay band 6 (middle managers with enhanced responsibilities & equivalents); pay band 5 (senior probation officer & equivalent); pay band 4 (probation officer & equivalent); pay band 3 (probation services officer & equivalent); pay band 2 (case administrator & equivalent); pay band 1 (administrative staff & equivalent); and other/not recorded.

This is made up of probation regional managers
- 5.3: total number of senior probation officers: 720 (nps) and 790 (crc) = 1,510 fte
This is made-up of pay band 5.
- 5.4: total number of qualified probation officers: 3,040 (nps) and 1,400 (crc) = 4,440 fte .
■ This is made-up of pay band 4 probation officer.
- 5.5: total number of un-qualified probation staff: 2,970 (nps) and 4,350 (crc) = 7,320 fte.
■ This is made up of pay band 3 and an element of pay band 4 (non-probation officer).
- 5.8: total number of other staff: 1,710 (nps) and 2,080 (crc) = 3,790 fte
This is made-up from all the remaining pay bands.
- 6. there were approx. 6.5 fte staff employed by crcs but funded by the nps on the snapshot date. This staffs have been included within the breakdown figure for the crcs.
- 7. Staff in this return are categorised differently from official statistics and therefore these figures will differ from published statistics

- 8.the figures provided under [5.9] represents the calendar year direct spend on the delivery of probation services. Due to the complete reconfiguration of probation services during the year, which changed the classification of some expenditure, this figure is not directly comparable with the previous year's figure.

Notes – Tables 6.1 and 6.2

Austria:

- 6.1. : 9.190 reports concerning victim offender mediation, 3.347 reports related to unpaid work as diversional measure (community service after the sentence), 205 reports on probation as diversional measure, 413 reports are related to trials during the client was under probation and 144 reports were written on the demand of the court that wants to know whether probation would be a suitable reaction in case of conviction (§15 Bewhg).
- 6.3.: 4.569 reports related to unpaid work instead of imprisonment (community service after the sentence) and 6.711 reports on the probation progress after a conviction or conditional release.

Croatia:

- General comment: The Probation Service delivers advisory reports to enforcement judges or prisons/penitentiaries with respect to suspended prison sentences, utilization of benefits and conditional releases. The accurate number of advisory reports with respect to conditional releases alone is not at our disposal, hence all three specified types of advisory reports are included in the total number.

Czech Republic:

- 6.1: Number of pre-sentence reports for home arrest, community service and documents related to the substitution of pre-trial detention with probation.
- 6.3: e. g. Pre-sentence reports for the replacement of protective treatment with probation.

Hungary:

- General comment :There are two main categories of advisory reports in Hungary: probation advisory reports and social inquiry reports.
Probation advisory reports are made by probation officers at the request of the prosecutor or the judge in different cases e.g. before sentence or at the request of prison judge with respect to conditional release. Since August 2014 task of making advisory reports with respect to conditional release has been delegated to the Prison Service, so the given number shows number of advisory reports prepared until August 2014.
Total number of probation advisory reports prepared in juvenile cases: 1553.
Most of social inquiry reports are made in juvenile cases. From the total number of social inquiry reports only 1812 was prepared in adult cases.
Social inquiry reports are prepared in every juvenile cases at the request of the police. Probation officers make social inquiry reports also at the request of the penal institution on reception of the juvenile for imprisonment, for the authorisation of the interruption of imprisonment, during reprieve proceedings, and for the preparation of the decision about cancellation of payment of costs of criminal procedure or court fine.

Ireland:

- 6.3: "Other reports" are:
Community service reports: 2477.

Victim impact reports: 53.

Repatriation reports: 18.

The number of reports prepared can include more than one report per offender. Pre-Sentence Reports and Community Service Reports include update reports requested by the judge and the number prepared is therefore greater than the number of initial referrals for reports.

In 2014 the number of initial referrals for Pre-Sanction Reports was 4817, Community Service Reports was 1943 and Probation with Community Service was 649.

Italy:

- 6.1: Reports for cases of observation of offenders at liberty.
- 6.3: "Other reports" are:
Inquiries related to security measures: 1519.

Moldova:

- 6.3: "Other reports" are informativen notes (If the person on which the presentence report is drawn up does not collaborate or is not found, the probation counselor shall submit a note accompanied by the evidence of the facts found and the impossibility of drawing the report).

Netherlands:

- 6.3: "Other reports" are:
Cases of treatments, other kinds of releases, dutch persons in foreign prisons etc. :
1879.

Portugal:

- 6.3: "Other reports" are all documents produced after sentence in support of the implementation of measures.

Romania:

- 6.1: Reflects the figures for the pre-sentence reports prepared regarding the adults.
- 6.3: The other report are prepared during the probation period, in order to reflect or request specific changes of the probationer situation or conditions.

Serbia:

- 6.3: This category "Other" includes regular reports prepared in the middle of the sentence enforcement period and final reports following the finalisation of the sentence enforcement, as well as extraordinary reports prepared for courts to inform them on extraordinary situations (justified or unjustified), which have an effect on regular enforcement of the sanction and programme.

UK: Scotland:

- General comment: Figures are for financial year 2013-14. All flow figures are for cases (and not individuals) as the data are not collected in a way that allows this level of analysis for all categories.

Annual Module - 2014 survey: *Criminal offences and probation*

Every year, the SPACE II survey focuses on a sanction or measure in order to gather more detailed information about it. This year, the annual module focuses on the **types of offenses covered by the probation measures**.

The table AM.1 present the criminal offences for which alternative sanctions are used. The tables AM.2 and AM.3 present the stock and flow of entries and the flow of exits for each kind of criminal offences. And finally, the table AM.4 present the length of stay in probation by criminal offences using the demographic model of stationnary population.

The “comments” section was mostly used by the respondants to describe juridical specificities.

The amount of supervisions in this module is does not match with the main module. The reason is that some o the supervisons is voluntarily and as much not meant to be counted in probation service but it's not possible to segregate them in data concerning crime.

Estonia :

- General comment :One person can be represented under different types of offences because he/she has committed more than one type of crime. For example a person who has committed both robbery and murder is included on both types of offences.

France:

- General comment: data by offences are not available

Georgia:

- General comment: Probation sentence can be applied in exceptional cases for all offences of Georgian criminal code.

Germany:

- General comment: Depending on the circumstances a fully suspended sentence with probation is a possible sanction for every offence. If a person is sentenced to a term of imprisonment not exceeding one year the court shall suspend the enforcement of the sentence for a probationary period if there are reasons to believe that the sentence will serve as a sufficient warning to the convicted person and that he will commit no further offences without having to serve the sentence. The court shall particularly take into account the character of the convicted person, his previous history, the circumstances of his offence, his conduct after the offence, his circumstances and the effects to be expected from the suspension. Under certain conditions the court may also suspend a term of imprisonment not exceeding two years (see section 56 para 2 of the German Criminal Code).

Source: Statistisches Bundesamt (Ed.) "Bewährungshilfe 2011" (more recent data is not available). These numbers cover data for December 31st 2011 and for the former territory of the Federal

Republic of Germany including Berlin (data 2007), but excluding Hamburg. The data covers supervisions conducted by person working primarily as parole officers only. Statistisches Bundesamt (Federal Statistical Office) (Ed.), Bewährungshilfe 2011, Tables 2 and 5.

The statistic counts the total number of supervisory care. As one person can be under supervisory care more than once (average in 2011: 1.2) this number does not equal person.
